HESSISCHE BAROCKPAUKEN *TM* are warranted for 3 years against defects in parts and workmanship. This does not include inappropriate use such as dropping the drums or other accidents, including denting of the copper bowls. In such situations we will repair or replace based on the cost of parts and labor. The goatskin heads are guaranteed for 1 year upon delivery, but should last much longer with proper care.

OPTIONS AVAILABLE:

CASES

HESSISCHE BAROCKPAUKEN *TM* can be fitted to 22" bass drum cases for local transport. If you need road cases for airtravel or shipping we can recommend our friends at Slamhammer Roadcases to build custom cases for you. Please contact us for an estimate.

“T” HANDLES TUNING KEYS FOR EVERY LUG

For those who wish to add “T” handles to all the lugs, we can supply 11 discreet appropriately designed “T” handles which can be attached solidly or removed easily using built in set screws. The price for these is based on the cost of materials and labor. Please get in touch for an estimate.

SCHALLTRICHTER

A *Schalltrichter* is a horn or trumpet shaped bell affixed to the bottom of the inside of the kettle directly over the airhole. These funnels were very commonly found inside Baroque timpani in certain parts of Europe. HESSISCHE BAROCKPAUKEN *TM* can be fitted with these accoustical “enhancers” upon request. Please contact us for an estimate. Price is based on cost of materials and labor.

I endorse the MB MALLETS “Baroque/Classical” models which are excellent copies of historical timpani mallets. These can be found at mbmallets.com
